**Subject:** Questions Concerning USEPA Plan Comments

....  
 >>>  
 JJ,

Hope all is well with you. Sorry to bother you, but we have a few clarifying questions related to the comments provided by the USEPA Work Plan comments. Those questions are provided below.

*Section 15.a.i, Surface Run-off:*

*1. Please identify specific locations.*

Locations of what? Do you mean surface water flow direction or runoff locations?

*Section 15.a.i, Proposed future actions for 15.a.i:*

*1. In order to evaluate whether additional sampling and assessment of the above pathways is needed, U.S. EPA needs to evaluate the proposed report summarizing the data collected. Additional information related to the evaluation of the two drains/outfalls not part of the pad or slope drainage will also need to be included per above comments.*

We are confused by the term "proposed report". We were planning on providing tables of the data and summary graphs per your request in the revised work plan. Any formal report would be submitted as part of compliance with this work plan. Is the adequate?

Please call or respond by e-mail if you have any questions.

**Steve Tink**
